

There are two options for extracting approximately correct entities:

- ▶ Reconcile entities with extracted entities of another article in database or
- ▶ generate a new query and add new list of articles to the database

Example:

Renewable Energy R&D in Public Research Centres: Assessing its relation with the industry in Mexico

Entities —> Name: [], Organization: Public Research Centres , Year: []

View the profile for LILIANA ESTRADA GALINDO in Mexico City Area, Mexico, who attended University of Oxford

Entities —> Name: LILIANA ESTRADA GALINDO , organization: University of Oxford, Year: []

Reconcile entities

Entities —> Name: LILIANA ESTRADA GALINDO , organization: University of Oxford, Year: []
